

NeedNow — Database Schema

AI-Powered Shopping Assistant · Clerk Auth · Prisma ORM · 14 tables

users		
PK	id	String · Clerk User ID
	createdAt	DateTime · default: now()
	updatedAt	DateTime · auto-updated

user_preferences		
PK	id	String · uuid
FK	userId	String · users.id - unique
	dietaryTags	String[] · vegan, gluten-free, ...
	favoriteBrands	String[]
	budgetMonthly	Float? · monthly cap
	currency	String · default: INR
	householdSize	Int · default: 1
	locale	String · default: en-IN

categories		
PK	id	String · uuid
	name	String · unique · e.g. Dairy
	slug	String · unique · URL-safe
FK	parentId	String? · categories.id
	iconUrl	String?

products		
PK	id	String · uuid
	name	String
FK	categoryId	String · categories.id
	brand	String?
	unit	String · kg / L / piece
	unitSize	Float · e.g. 0.5 for 500 g
	barcode	String? · unique
	imageUrl	String?
	isVerified	Boolean · default: false

inventory		
PK	id	String · uuid
FK	userId	String · users.id
FK	productId	String · products.id
	quantity	Float · current stock
	lowStockThreshold	Float? · alert trigger
	expiresAt	DateTime? · optional expiry
	updatedAt	DateTime · auto-updated

consumption_events		
PK	id	String · uuid
FK	userId	String · users.id
FK	productId	String · products.id
	quantity	Float · amount consumed
	source	String · manual / ai_inferred
	confirmedAt	DateTime? · null = pending
	createdAt	DateTime · default: now()

situations		
PK	id	String · uuid
FK	userId	String · users.id
	label	String · Camping / Medical...
	rawInput	String · user's original text
	resolvedAt	DateTime? · null = in progress
	createdAt	DateTime · default: now()

conversations		
PK	id	String · uuid
FK	userId	String · users.id
	title	String? · AI-generated summary
	mode	String · text / voice
FK	situationId	String? · situations.id
	createdAt	DateTime · default: now()
	updatedAt	DateTime · auto-updated

messages		
PK	id	String · uuid
FK	conversationId	String · conversations.id
	role	String · user / assistant
	content	String · message text
	metadata	Json? · tool calls, citations
	createdAt	DateTime · default: now()

memories		
PK	id	String · uuid
FK	userId	String · users.id
	key	String · e.g. preferred_gpu
	value	Json · structured data
	confidence	Float · 0-1 AI confidence
	source	String · explicit / inferred
	updatedAt	DateTime · auto-updated

orders		
PK	id	String · uuid
FK	userId	String · users.id
FK	situationId	String · situations.id
	status	String · pending / shipped
	totalAmount	Float · total price
	currency	String · default: INR
	platform	String · external provider
	externalOrderId	String · from platform
	createdAt	DateTime · default: now()
	updatedAt	DateTime · auto-updated

order_items		
PK	id	String · uuid
FK	orderId	String · orders.id
FK	productId	String · products.id
FK	marketplaceCacheId	String? · marketplace_cache.id
	name	String · product name
	quantity	Float · ordered amount
	unitPrice	Float · price per unit
	category	String · product category
FK	addedByUserId	String · users.id

order_collaborators		
PK	id	String · uuid
FK	orderId	String · orders.id
FK	userId	String · users.id
	role	String · helper / assistant
	splitAmount	Float · share of total
	splitType	String · flat / proportional
	paidAt	DateTime · when paid

marketplace_cache		
PK	id	String · uuid
	platform	String · marketplace name
	externalId	String · from platform
	name	String · product name
	price	Float · current price
	currency	String · default: INR
	inStock	Boolean · availability
	deliveryEta	String · estimated time
	imageUrl	String · product image
